B:Music

Health and Safety / Special Effects

Pyrotechnics

- Please note that the use of pyrotechnics and haze is strictly prohibited within the foyer spaces

Special Effects

- When confetti and streamers are used, there will be an additional charge for cleaning
- Laser use must be accompanied by full RAMS and may be subject to a venue inspection charge for safe use

Noise Limits

Symphony Hall follows the HSE guidelines for noise limits in performance spaces. A set of guidelines for these can be obtained from your production lead. Our venue staff will monitor decibel levels on any given event and if the limits are met, pushed or exceeded the FOH engineer on duty will be asked to reduce levels accordingly.

B:Music

Access and Parking

Depending on event activity within the main auditorium, we may be able to accommodate vehicles in the Symphony Hall loading bay, off Broad Street. Your allocated production lead or venue contact will inform you of any available space, and would require registration plates for all vehicles, at least one working day prior to your event.

There is a flat route from the loading bay to the stalls level foyer, or a shorter route involving a small number of stairs. For flat access to the upper levels, there is a passenger lift available for smaller equipment only.

Access to the Patrick Music Studio is via lift or stairs.
